

ENGINEERING CHEMISTRY [BAS 202]

07 Marks Most Important Questions:-

Unit: 01 Atomic & Molecular Structure

- > Liquid Crystals
- > Graphite and Fullerene. (M. Imp 100%)
- > Nanomaterials (M. Imp 100%)
- > Draw Molecular Orbital Diagram of O_2 / NO / CO and also Calculate Bond order and magnetic behaviour.

Unit: 02 Spectroscopic Techniques & Applications

- > NMR Spectroscopy + Numerical — m. Imp (100%)
↓
(chemical shift / shielding and deshielding / TMS)
- > Molecular Vibrations in IR Spectroscopy. } — 1 question
Application $\begin{matrix} \swarrow \text{UV} \\ \searrow \text{IR} \end{matrix}$
- > Stereochemistry — 1 question (section-B) m. Imp (100%)

Unit:-3 Electrochemistry

- > Batteries (Primary cells (Dry cell) / ^{m. Imp} Secondary cell (Lead Acid Battery)
↳ Q.3.6 (100%)
- > Electrochemical Corrosion and write down the mechanism involved in Electrochemical Corrosion. ^{m. Imp (100%)}
↳ Q.3.9
↳ Q.3.12 (100%) Imp
- > Cement (Section -B 100%)

Unit-4

- Ion Exchange / Zeolite Process - + Num. (V. Imp)
- Lime + Soda Numerical (V. Imp)
- Bomb Calorimeter + Theory + Numerical (V. Imp)

Unit:-5

- Biodegradable and Conducting Polymer
- Diffn b/w Thermosetting and Thermoplastic Polymers.
- Buna-N & Buna-S, Nylon, ~~Ket~~ Kevlar, Terylene, Lucite
- Organometallic compound (Griignard / LiAlH_4)
(V. Imp) (Imp)
